

CHECK LIST

TESTING AREA	TEST CASE	EXPECTED RESULT	STATUS
DATA VALIDATION	Verify Fact Subscription Sales	All required subscription transaction records and fields are loaded correctly	✓
	Verify Customer Data	All required customer records are loaded correctly	✓
	Verify Platform Data	All platform records are loaded correctly	✓
	Verify Plan Data	All plan records are loaded correctly	✓
	Verify Content Data	All content records are loaded correctly	✓
	Verify Location Data	All location records are loaded correctly	✓
	Verify Date Data	Date table contains continuous dates for the required reporting period	✓
	Check missing / null values	Missing attributes are reviewed and handled without inventing values	✓
	Verify duplicate records	Duplicate fact and dimension keys are removed or validated	✓
DATA MODEL & RELATIONSHIPS	Verify Star Schema	Fact table is connected to the required dimension tables	✓
	Verify Fact Table Grain	Each Sale_ID represents one subscription transaction	✓
	Verify Customer Relationship	DimCustomer filters FactSubscriptionSales correctly using a 1:* relationship	✓
	Verify Platform Relationship	DimPlatform filters FactSubscriptionSales correctly using a 1:* relationship	✓
	Verify Plan Relationship	DimPlan filters FactSubscriptionSales correctly using a 1:* relationship	✓
	Verify Content Relationship	DimContent filters FactSubscriptionSales correctly using a 1:* relationship	✓
	Verify Location Relationship	DimLocation filters FactSubscriptionSales correctly using a 1:* relationship	✓
	Verify Date Relationship	DimDate filters FactSubscriptionSales correctly using a 1:* relationship	✓
	Verify Cross-filter Direction	Dimension-to-fact relationships use single-direction filtering	✓
KPI & MEASURE TESTING	Verify Total Revenue	Total Revenue displays the validated dashboard value	✓
	Verify Total Transactions	Total Transactions counts distinct Sale_ID values correctly	✓
	Verify Total Customers	Total Customers counts unique customers correctly	✓
	Verify Active Customers	Active Customers displays the correct active customer count	✓
	Verify Churned Customers	Churned Customers displays the correct churned customer count	✓
	Verify Churn Rate	Churn Rate calculates the correct percentage	✓
	Verify Renewal Rate	Renewal Rate calculates the correct percentage	✓
	Verify Revenue per Customer	Revenue per Customer returns the correct value	✓
	Verify Average Transaction Value	Average Transaction Value returns the correct value	✓
	Verify YoY Revenue Growth	YoY Revenue Growth calculates year-over-year change correctly	✓
	Verify Previous Month Revenue	Previous Month Revenue returns the previous-month value correctly	✓
	Verify MoM Revenue Growth	MoM Revenue Growth calculates the change from the previous month	✓
	Verify YTD / MTD Revenue	YTD and MTD measures return the correct time-intelligence values	✓

TESTING AREA	TEST CASE	EXPECTED RESULT	STATUS
DASHBOARD & VISUAL TESTING	Verify Executive Overview	Executive Overview displays the required KPIs and revenue insights correctly	✓
	Verify Sales & Platform Analysis	Sales and platform visuals display correctly	✓
	Verify Customer & Subscription Analysis	Customer, churn and subscription visuals display correctly	✓
	Verify Content & Geographic Analysis	Content and geographic visuals display correctly	✓
